

Damilola Bada

Software Developer

I am a developer with 3 years of hands-on experience building reliable, user-focused web applications. Proficient in React, React Native, Node.js, and TypeScript, I take a product-minded approach to development, prioritizing great user experiences without compromising on code quality or performance. I thrive in fast-paced, collaborative environments and enjoy solving real-world problems with clean, scalable solutions.

SKILLS

Frontend:

React, React Native, Next.js, Storybook

Backend:

Node.js, Express.js, API Design

Languages:

TypeScript, JavaScript, SQL, Golang

Dev Tools & Practices:

Docker, CI/CD, Jira, Test-Driven Development (TDD), Git

Soft Skills:

Leadership, Project Management, User Experience (UX)

COURSES

Frontend & User Experience (UX):

LinkedIn & Udemy

- React Hooks, User Experience (UX) – LinkedIn
- React: Securing Applications – LinkedIn
- The Web Developer Bootcamp 2022 – Udemy

Project Management:

LinkedIn

- Project Management Foundations
- SCRUM Foundations

Data & Business Intelligence:

Codecademy & Udemy

- Learn SQL – Codecademy
- The Business Intelligence Analyst Course 2021 – Udemy

LANGUAGES

English - C2

Native or Bilingual Proficiency

German - B2

Professional Working Proficiency

WORK EXPERIENCE

Team Lead, Fullstack Development

apomap GmbH

01/2025 - Present

Winterberg, Germany

- Lead the development team in building and scaling apomap's pharmacy and logistics platform, focusing on clean architecture, maintainability, and system performance.
- Drive key product decisions in close collaboration with founders and stakeholders, shaping features based on user feedback, business needs, and technical feasibility.
- Manage project planning and execution – from defining technical requirements to coordinating timelines and ensuring timely delivery of high-impact features.
- Guide architectural decisions and tech choices across the stack, improving development velocity and reducing technical debt.
- Support team growth through mentorship, regular code reviews, and fostering a collaborative engineering culture.

Fullstack Developer

apomap GmbH

11/2022 - 12/2024

Winterberg, Germany

- Built and shipped core features using React, Firebase, Node.js, and TypeScript, directly contributing to improved pharmacy workflows and a 20% increase in subscriptions.
- Integrated external logistic services (GLS, Mauve, ShopApotheke) and pharmacy POS interfaces (awintaONE, ADG3000, pharmatechnik) to enable smooth workflow and increase efficiency for pharmacies.
- Improved performance and reliability through modern data-fetching patterns (React Query, WebSockets), including pagination, caching, and real-time updates.

Frontend Developer

MyCodeCareer

09/2022 - 11/2022

Boston, Massachusetts (Remote)

- Led a complete redesign of the company website with a focus on SEO, accessibility, and mobile responsiveness – resulting in a 50% increase in traffic.
- Collaborated with designers and stakeholders to improve user flows and interface clarity, increasing engagement among job seekers and learners by 25%.
- Optimized site performance through React enhancements, reducing load times and improving responsiveness across devices. • Contributed to a platform aimed at supporting early-career developers, helping shape a more intuitive and inclusive user experience.

Frontend Development Industry Training (Bootcamp)

Brainnest Consulting GmbH

06/2022 - 07/2022

Bremen, Germany

- Completed an intensive 2-month program focused on modern frontend technologies including HTML, CSS, JavaScript, and React.
- Built responsive web interfaces from scratch, applying design best practices and accessibility standards.
- Gained hands-on experience through real-world projects and team-based collaboration in an agile development environment.
- Strengthened my skills in version control (Git), code reviews, and iterative development processes.

WORK EXPERIENCE

Career Transition & Self-Development

Fullstack Developer (Self-taught) | Personal & Freelance Projects

06/2020 - 05/2022

Germany

- Completed intensive self-guided training in fullstack web development (JavaScript, HTML/CSS, React, Node.js, WordPress).
- Built and maintained websites using WordPress and Elementor for personal projects and acquaintances.
- Gained hands-on experience with responsive design, plugin integrations, and CMS workflows.
- Collaborated informally with small businesses to improve their online presence.

Career Break

Due to COVID-19 Pandemic

01/2020 - 05/2020

Germany

- Used this time for reflection and planning a transition into the tech industry.

EDUCATION

M.Sc. Environmental Science

Albert-Ludwigs-Universität

09/2015 - 03/2019

Freiburg, Germany

- Relevant coursework: Data Analysis, GIS, Critical Thinking, RStudio with 1.7 GPA.
- Developed strong analytical and problem-solving skills through data-intensive research and scientific modelling.
- Gained experience working with data pipelines, geospatial tools, and statistical software — foundational skills that translate directly into software engineering and product thinking.
- My master's thesis and academic work emphasized structured experimentation, user-centric solutions, and the ability to learn and adapt quickly—all essential traits in tech and startup environments.

PERSONAL PROJECTS

URL Analyzer

- Full-stack web application for automated website analysis. It crawls URLs to extract data such as HTML versions, heading structures, internal/external links, and broken links. Features real-time job progress, interactive dashboards, rich visualizations, and Docker-based deployment.
- **Tech:** React, Vite, TypeScript, Tailwind CSS, Go (Gin), MySQL, Docker, TanStack Query, Zustand.
- **GitHub:** github.com/damygoes/url-analyzer

Archetype – Microservices Architecture Case Study

- Case study project demonstrating a modular Node.js microservices architecture using a monorepo setup. Features shared TypeORM models, service-level Docker containers, and independent service deployment workflows.
- **Tech:** TypeScript, Node.js, Express, TypeORM, MySQL, Docker, Lerna.
- **GitHub:** github.com/damygoes/archetype

Reflect – Wellness & Journaling App

- A mobile-first journaling and mindfulness app for mood tracking and self-reflection. Designed with a modern, glassmorphic UI using React Native and Expo, powered by Supabase for authentication and database storage.
- **Tech:** React Native, Expo, Supabase, TypeScript.
- **GitHub:** github.com/damygoes/reflect

KPI Bot – Stripe Metrics Dashboard

- SaaS dashboard that connects to Stripe accounts and visualizes real-time subscription metrics including MRR, ARR, churn rate, and more. Built to help teams share and understand key metrics transparently.
- **Tech:** Next.js, TypeScript, Stripe API, Drizzle ORM, PostgreSQL, Recharts, Shadcn UI.
- **GitHub:** github.com/damygoes/kpi-bot
